

Online Survey Administration Guide

Your school has elected to participate in the *Texas School Survey of Drug and Alcohol Use*. The survey is sponsored and designed by the Texas Health and Human Services Commission (HHSC) and is facilitated by the Public Policy Research Institute (PPRI) at Texas A&M University. You will be administering the survey in one or more classrooms at your campus. PPRI has prepared this Survey Administration Guide to provide information and instructions for conducting the survey.

- Each classroom envelope should contain a small piece of paper for each student with a number, which is an online survey token. If necessary, additional online survey tokens should be requested from the survey coordinator at your campus. Please only administer the survey to the class listed on the label; as these are the classes that received parental notification.
- Please read all instructions carefully before administering the survey. It is important that these procedures are followed so that administration of the survey is uniform throughout each school. Please stress to the students that their responses are **entirely anonymous**. The tokens are completely random and there is no way to know which student responded to a particular survey.
- Your attitude towards this survey is extremely important. If students sense the importance of this information, they will take the survey more seriously.
- Survey responses must be kept private; therefore students should be reminded to not look at the computer screens of other students.
- In addition, your physical position in the room may influence the way students answer questions. While students are taking the survey, do not walk around the room. Please sit or stand in a part of the room away from students.
- Try to keep students as quiet as possible throughout survey administration. If students are allowed to talk about the contents of the survey or their own experiences, peer influence could cause students to either inflate or under-report their own substance use habits.
- The survey should take approximately 40 minutes to administer.
